

SUMMARY

Recent cybersecurity graduate with hands-on experience supporting Windows and Linux systems, troubleshooting network connectivity issues, configuring virtualized lab environments, and analyzing system and security events. Experienced using VMware Workstation Pro, Active Directory, Splunk Enterprise, Docker, and Wireshark to configure, monitor, and troubleshoot enterprise-style environments. Strong communication, customer service, and problem-solving skills developed through operations support roles and technical lab projects.

EDUCATION

B.S. Cybersecurity, Cyber Operation Concentration

May 2026

Utica University, Utica, NY

- Relevant Coursework: Cybersecurity Fundamentals; Programming Principles; Computer Hardware and Systems; Software and Operating System Security Foundations; Information Security; Network Security and Defense; Advanced Cybersecurity Analysis; Senior Capstone Project
- **Phi Theta Kappa Honor Society Scholarship** – Phi Theta Kappa
- **Transfer Achievement Scholarship** – Utica University
- GPA: 3.69

B.S. Cybersecurity, Cyber Operation Concentration

August 2023 – December 2024

Westchester Community College, Valhalla, NY

- Coursework in Cybersecurity and Computer Systems
- GPA: 3.72

PROFESSIONAL EXPERIENCE

Utica University, Utica, NY

January 2024 - Present

Academic Cybersecurity Labs

- Configured and administered Windows and Linux virtual machines in VMware Workstation Pro environments
- Managed Active Directory user accounts, permissions, and domain-joined Windows systems in Windows Server environments
- Configured and troubleshot TCP/IP networking, DNS, and connectivity issues between Windows and Linux systems
- Used Wireshark to inspect network traffic and wireless packet captures to identify malicious behavior
- Supported enterprise-style lab environments across Windows 10/11, Windows Server, Ubuntu Linux, and Kali Linux systems
- Performed system configuration, software installation, and command-line troubleshooting in Windows and Linux environments

Student Living – Utica University, Utica, NY

October 2025 – April 2026

Operations Coordinator

- Entrusted with confidential student information while maintaining confidentiality of said information
- Provided operational support in a fast-paced environment while assisting students and resolving day-to-day issues
- Coordinated with staff and residents to troubleshoot issues and maintain efficient daily operations

RELATED PROJECTS

Utica University Cybersecurity Department, Utica, NY

January 2026 – May 2026

Impact of Firewall Rules on SOC Detection

- Built and maintained a virtual lab environment using pfSense, Windows, Kali Linux, and VMware Workstation Pro to test network configurations and firewall behavior
- Configured and tested multiple firewall rule sets to compare their impact on intrusion detection and SOC alert visibility
- Tested network visibility and connectivity using Nmap and network analysis tools
- Documented firewall rule testing, alert analysis, and SOC monitoring findings through formal technical reporting

CERTIFICATIONS

Security+ CE, CompTIA

September 2025

Network+, CompTIA

In Progress

ISC2 Certified in Cybersecurity (CC), ISC2

In Progress

INVOLVEMENT

Resident Housing Association, Secretary

September 2025 – November 2025

- Maintained meeting documents, records, and organization communications
- Assisted in coordinator administrative tasks and student engagement efforts
- Supported continuity of the organization during a transitional period
