

SUMMARY

Cybersecurity student seeking a B.S. in Cybersecurity with a concentration of Cyber Operations. Has hands-on experience using SIEM platforms, intrusion detection, malware analysis, and network traffic analysis through academic labs and projects. Contains the ability to use tools such as Suricata, Snort, Wireshark, Splunk, and VMWare Workstation Pro. Experience analyzing alerts, altering detection rules, and responsibly maintaining sensitive information. Seeking to expand skills in a Blue Team focused role.

EDUCATION

B.S. Cybersecurity, Cyber Operation Concentration

May 2026

Utica University, Utica, NY

- Relevant Coursework: Cybersecurity Fundamentals; Programming Principles; Computer Hardware and Systems; Software and Operating System Security Foundations; Information Security; Network Security and Defense; Advanced Cybersecurity Analysis; Senior Capstone Project
- **Phi Theta Kappa Honor Society Scholarship** – Phi Theta Kappa
- **Transfer Achievement Scholarship** – Utica University
- GPA: 3.64

B.S. Cybersecurity, Cyber Operation Concentration

August 2023 – December 2024

Westchester Community College, Valhalla, NY

- Coursework in Cybersecurity and Computer Systems
- GPA: 3.72

PROFESSIONAL EXPERIENCE

Utica University, Utica, NY

January 2024 - Present

Academic Cybersecurity Labs

- Investigated IDS/IPS alerts using Suricata and Snort, tuning rules to reduce false positives and alert fidelity
- Performed malware analysis on real-world malware samples using ANY.RUN to evaluate persistence mechanisms, C2 behavior, and runtime behavior
- Reviewed security events and log data on SIEM platforms to allow timely detection and escalation of security incidents
- Used Wireshark to inspect network traffic and wireless packet captures to identify malicious behavior
- Performed security analysis in enterprise-style lab environments across various Windows operating systems, such as Windows 10/11, Windows Server 2008, 2019, Linux, and Kali Linux systems

Student Living – Utica University, Utica, NY

October 2025 - Present

Operations Coordinator

- Entrusted with confidential student information while maintaining confidentiality of said information
- Support daily operations on campus to allow for improved residential experiences for students
- Communicate with professional staff to address issues to maintain a safe, functional, and fair living environment for students

RELATED PROJECTS

Utica University Cybersecurity Department, Utica, NY

January 2025 - Present

Impact of Firewall Rules on SOC Detection

Hypothesis:

- Developing a virtual SOC environment including network traffic generation, IDP/IPS tools (e.g. pfSense and Suricata), and centralized logging
- Spotting gaps in accuracy of intrusion detection caused by default IDS/IPS rules and excessive false positives
- Evaluating behavior before and after tuning rules to view changes alert quality
- Documenting all findings and lessons learned through formal academic reporting

CERTIFICATIONS

Security+, CompTIA

September 2025

Network+, CompTIA

In Progress

ISC2 Certified in Cybersecurity (CC), ISC2

In Progress

INVOLVEMENT

Resident Housing Association, Secretary

September 2025 – November 2025

- Maintained meeting documents, records, and organization communications
- Assisted in coordinator administrative tasks and student engagement efforts
- Supported continuity of the organization during a transitional period
